

# ATLANTA BUSINESS CHRONICLE

## Top Plastic Surgeon Ben Stong Brings Profound Non-Surgical Skin Tightening to Atlanta

Double board-certified plastic surgeon Ben Stong now offers revolutionary skin tightening that lifts and tightens facial skin without surgery or fillers. It stimulates the body's natural production of collagen, elastin and hyaluronic acid.

**Atlanta's Dr. Stong is proud to offer a breakthrough treatment that can tighten and lift skin without fillers, toxins or surgical downtime. This Profound RF Microneedling technology uses temperature-controlled radiofrequency energy to boost the main building blocks of youthful skin.**

During a single in-office treatment, Profound stimulates the body's natural production of collagen, elastin and hyaluronic acid, which are lost as we age. This makes it an ideal solution for those who want a more natural approach to facial rejuvenation. Profound can improve skin texture and quality, reduce wrinkles, treat acne scars and add volume and resiliency to the jawline, neck, nasolabial folds and cheeks. It can also be utilized for a non-surgical face, cheek or neck lift.

**"I am thrilled to offer Profound, as it gives patients an opportunity to dramatically reverse the effects of facial aging by stimulating the body's own rejuvenation process instead of using fillers, toxins or surgery," says Dr. Stong. "I am seeing a 100% patient response rate and no downtime with this amazing treatment."**

Profound RF Microneedling is safe and effective for all skin types, including ethnic skin. Patients may choose Profound as a stand alone service or as a compliment to other treatments.
