

## Kalos Moving to Elite Buckhead Digs in Summer 2018

***In Summer 2018, 371 East Paces Ferry, Atlanta's first new medical office building in years, is scheduled to open in the heart of Buckhead. We spoke with Dr. Stong of KALOS Facial Plastic Surgery to learn more about his impressive background and why he chose to relocate to our new building.***

**Would you tell us about your background and experience?** Well, I'm dual board-certified in Head and Neck Surgery and Facial Plastic and Reconstructive Surgery, and I completed my fellowship under one of the most nationally renowned plastic surgeons. I provide the most advanced techniques in facial plastic surgery and other cosmetic services.

**Have you received any recognition for your work?** This year I will be named a "Top Doctor" by Castle Connolly for the fourth year in a row. It's an honor that motivates me to stay at the forefront of facial plastic surgery and continue to offer the most innovative procedures to my patients.

**What sort of procedures set you apart from other surgeons?** I am the only surgeon in the area to offer an advanced deep plane facelift. With careful attention to detail, plus of course study and experience, I have taken the already advanced deep plane facelift procedure and improved it with my own advanced techniques. It's

the best kind of facelift you can get. We call it the KalosLift. It can knock 15 years off your look.

**It sounds amazing! The Loudermilk Companies is very excited about your relocation to 371 East Paces Ferry. What are your thoughts on that move?** I know it won't happen until July, but we can't wait! The location is considered "walker's paradise," easily accessible to the Buckhead Village shops, eateries and services. Plus, there is plenty of on-site parking and an on-site pharmacy! I can't tell you how important that kind of convenience is!

**We have included a photo of your signing your lease. How did it feel?** That picture actually captures the culmination of my lifetime of education, training, and building my practice! So it was one of the single biggest moments in my life.

**What else do you think our readers should know?** I recently joined the Cosmetic and Reconstructive Support Medical Advisory Council of the National Coalition Against Domestic Violence, a highly-esteemed honor reserved for the most qualified and respected plastic surgeons. Talk about a worthy cause!
